

1. Record Nr.	UNINA9910818982703321
Autore	Zariski Oscar
Titolo	Theory and applications of holomorphic functions on algebraic varieties over arbitrary ground fields // Oscar Zariski
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , [1951] ©1951
ISBN	0-8218-9994-5
Descrizione fisica	1 online resource (99 p.)
Collana	Memoirs of the American Mathematical Society, , 0065-9266 ; ; number 5 (1951)
Soggetti	Algebraic functions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Cover title.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Contents""; ""Introduction""; ""Part I: General Theory of Holomorphic Functions""; ""1. Strongly holomorphic functions""; ""2. Strongly holomorphic functions on affine models""; ""3. The general concept of a holomorphic function""; ""4. Rational holomorphic functions. Some unsolved problems""; ""5. Digression on algebraic points""; ""6. Holomorphic functions, analytical irreducibility and a connectedness criterion""; ""7. Analytical Irreducibility and normalization""; ""8. Some lemmas on m-adic rings""; ""9. Holomorphic functions on affine models"" ""Part II: Invariance of Rings of Holomorphic Functions under Rational Transformations""""10. Holomorphic functions and semi-regular birational transformations""; ""11. Absolute birational Invariance of rings of holomorphic functions""; ""12. Reduction of the proof of the fundamental theorem to a special case""; ""13. The birational transformation $V \rightarrow V_0$""; ""14. Proof of the fundamental theorem in the case of the transformation $V \rightarrow V_0$""; ""15. Last step of the proof of the fundamental theorem: transition to the derived normal model V_0"" ""16. Extension of the fundamental theorem to rational transformations""""17. Reduction of the proof to a special case""; ""18. The rational transformation $V \rightarrow V_0$""; ""19. The transformation $V_0 \rightarrow V_0$""; ""Part III: The Principle of Degeneration""; ""20. A

connectedness theorem for algebraic correspondences""; ""21.
Algebraic systems of r-cycles""; ""22. Proof of the principle of
degeneration""
