Sommario/riassunto

This is a comprehensive guide to cervical cancer for nurses. It is a practically-based text for clinical nurses who wish to consolidate and update their knowledge of cervical cancer. It is concise, containing comprehensive information for general practice together with useful references to facilitate more in-depth study. Thus it provides an invaluable resource for both the registered nurse with a general interest in cervical cancer and for the nurse specialist working in primary health, gynaecology, oncology and palliative care. As well as

containing the essential chapters about the pathoph
