Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Frontmatter -- Contents -- Introduction -- Members of the IFLA Working Group on Functional Requirements and Numbering of Authority Records -- 1. Purpose -- 2. Scope -- 3. Entity-Relationship Diagram and Definitions -- 4. Attributes -- 5. Relationships -- 6. User Tasks -- Backmatter This book represents an important part of the extension and expansion Sommario/riassunto of the Functional Requirements for Bibliographic Records. It contains an analysis of attributes of various entities that are the centre of focus for authority data (persons, families, corporate bodies, works, expressions, manifestations, items, concepts, objects, events, and places), the name by which these entities are known, and the controlled access points

created by cataloguers for them. The conceptual model describes the

attributes of these entities and the relationships between them.
