

1. Record Nr.	UNINA9910819130903321
Autore	Broto Carles
Titolo	Automorphisms of fusion systems of finite simple groups of lie type / / Carles Broto, Jesper M. Møller, Bob Oliver
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , [2019] ©2019
ISBN	1-4704-5507-2
Descrizione fisica	1 online resource (vi, 163 pages) : illustrations
Collana	Memoirs of the American Mathematical Society ; ; Volume 1267
Classificazione	20D0620D2020D4520E4255R35
Disciplina	512.2
Soggetti	Finite simple groups
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Automorphisms of fusion systems of sporadic simple groups"--Title page.
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	"For a finite group G of Lie type and a prime p , we compare the automorphism groups of the fusion and linking systems of G at p with the automorphism group of G itself. When p is the defining characteristic of G , they are all isomorphic, with a very short list of exceptions. When p is different from the defining characteristic, the situation is much more complex, but can always be reduced to a case where the natural map from $\text{Out}(G)$ to outer automorphisms of the fusion or linking system is split surjective. This work is motivated in part by questions involving extending the local structure of a group by a group of automorphisms, and in part by wanting to describe self homotopy equivalences of $BG[\text{caret}]p$ in terms of $\text{Out}(G)$."--
