

1. Record Nr.	UNINA9910819278403321
Titolo	Preimplantation genetic diagnosis // edited by Joyce Harper [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2009
ISBN	1-107-20038-5 1-282-15573-3 9786612155734 0-511-54059-0 0-511-54093-0 0-511-53931-2 0-511-53848-0 0-511-58157-2 0-511-54015-9
Edizione	[Second edition.]
Descrizione fisica	1 online resource (viii, 294 pages) : digital, PDF file(s)
Disciplina	616/.042
Soggetti	Preimplantation genetic diagnosis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction to preimplantation genetic diagnosis / Joyce Harper -- Assisted reproductive technologies / Joyce Harper, Alpesh Doshi, and Paul Serhal -- Genetic basis of inherited disease / Joep Geraedts and Joy Delhanty -- Genetic counselling / Alison Lashwood -- Prenatal screening and diagnosis / Anna L. David and Charles H. Rodeck -- Preimplantation embryo development / Kay Elder -- Preimplantation genetics / Joy Delhanty and Dagan Wells -- Clinical aspects of preimplantation genetic diagnosis / Christine de Die-Smulders, Maartje van Rij, and Johannes Evers -- Polar body biopsy techniques / Markus Montag, Katrin van der Ven, and Hans van der Ven -- Cleavage-stage embryo biopsy / Anick De Vos -- Lastocyst biopsy / Monica Parriego, Francesca Vidal, and Anna Veiga -- Preimplantation genetic diagnosis for chromosome rearrangements / Caroline Mackie Ogilvie and Paul N. Scriven -- Preimplantation genetic diagnosis for infertility (PGS) / Santiago Munne -- Preimplantation

genetic diagnosis for sex-linked diseases and sex-selection for non-medical reasons / Caroline Mackie Ogilvie and Paul N. Scriven -- Preimplantation genetic diagnosis for monogenic disorders : multiplex PCR and whole-genome amplification for gene analysis at the single cell level / Karen Sermon -- Quality control and quality assurance in preimplantation genetic diagnosis / Alan Thornhill and Sjoerd Repping -- Preimplantation genetic testing : normative reflections / Guido de Wert -- Preimplantation genetic diagnosis : the future / Leeanda Wilton.

Sommario/riassunto

Preimplantation genetic diagnosis (PGD) is a key technique in modern reproductive medicine. Originally developed to help couples who were at risk of transmitting single-gene genetic abnormalities to their children, the development of the FISH technique broadened chromosome analysis to include detection of more complex inherited abnormalities. The last decade has seen the development of aneuploidy screening (PGS) for infertile couples, using the same techniques as PGD but screening for as many chromosomes as possible. PGD has always been a controversial procedure and embryo manipulation and selection is still illegal in some countries. The second edition of this leading textbook describes all aspects of PGD, with chapters written by key international experts in the field. A must for anyone interested in learning more about PGD, it will be of interest to everyone working in the fields of IVF, genetic diagnosis, genetic counselling, and prenatal diagnosis - including clinicians, embryologists, nurses, and clinical scientists.
