

1. Record Nr.	UNINA9910819452103321
Autore	Ruetsch Gregory
Titolo	CUDA Fortran for scientists and engineers : best practices for efficient CUDA Fortran programming / / Gregory Ruetsch and Massimiliano Fatica
Pubbl/distr/stampa	Waltham, MA : , : Morgan Kaufmann, , 2014
ISBN	0-12-416972-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xiii, 323 pages) : illustrations (some color)
Collana	Gale eBooks
Disciplina	005.13/1
Soggetti	FORTRAN (Computer program language)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	part I. CUDA Fortran programming -- part II. Case studies -- part III. Appendices.
Sommario/riassunto	CUDA Fortran for Scientists and Engineers shows how high- performance application developers can leverage the power of GPUs using Fortran, the familiar language of scientific computing and supercomputer performance benchmarking. The authors presume no prior parallel computing experience, and cover the basics along with best practices for efficient GPU computing using CUDA Fortran. To help you add CUDA Fortran to existing Fortran codes, the book explains how to understand the target GPU architecture, identify computationally intensive parts of the code, and modify the code to m
