Loss for Older Adults; Section IV: Coping With Losses in Life; 21 Adaptation, Resilience, and Growth After Loss; 22 Meaning Making and the Assumptive World in Nondeath Loss; 23 Concluding Thoughts; Index
Sommario/riassunto	This text is a valuable resource for clinicians who work with clients dealing with non-death, nonfinite, and ambiguous losses in their lives. It explores adjustment to change, transition, and loss from the perspective of the latest thinking in bereavement theory and research. The specific and unique aspects of different types of loss are discussed, such as infertility, aging, chronic illnesses and degenerative conditions, divorce and separation, immigration, adoption, loss of beliefs, and loss of employment. Harris and the contributing authors consider these from an experiential perspective
