1. Record Nr. UNINA9910819548303321

Autore	Danckwerts P. V. <1916->
Titolo	Insights into chemical engineering : (selected papers of P.V. Danckwerts)
Pubbl/distr/stampa	Oxford : , : Pergamon Press Ltd, , 1981 ©1981
ISBN	1-4832-8585-5
Edizione	[First edition.]
Descrizione fisica	1 online resource (327 pages) : illustrations
Disciplina	660.2
Soggetti	Chemical engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Front Cover; Insights into Chemical Engineering; Copyright Page; Forword; Table of Contents; AUTOBIOGRAPHICAL NOTE; GENERAL INTRODUCTION; SECTION A: Mathematics of Diffusion; Chapter A1. Kinetics of the absorption of carbon dioxide in water; REFERENCES; Chapter A2. Absorption by simultaneous diffusion and chemical reaction; 1. Introduction; 2. Exact and Approximate Solutions; 3. Depletion of Second Reactant; Chapter A3. Unsteady-state diffusion or heat conduction with moving boundary; 1. Introduction; 2. Conditions of the Problem; 3. Solutions of Diffusion Equations for Infinite Media 4. Application to Media bounded by Plane Surfaces 5. Problems of Class A; 6. Problems of Class B; 7. Examples: Class A; 8. Examples: Class B; Chapter A4. Absorption by simultaneous diffusion and chemical reaction into particles of various shapes and into falling drops; 1. Introduction; 2. Conditions of the Problem; 3. General Mathematical Method; 4. Examples; 5. Steady-state Solutions; 6. Absorption into Falling Drop with Surface Saturation; Chapter A5. Temperature effects accompanying the absorption of gases in liquids; 1. Introduction; 2. The heat of solution; 3. The heat of reaction REFERENCES Chapter A6. Gas absorption accompanied by first-order reaction: concentration of product, temperaturerise and depletion of reactant; Temperature; Product; Reactant; REFERENCES; Chapter A7. Absorption from bubbles of dilute gas; NOTATION; SECTION B: The Design of Gas Absorbers; Chapter B1. Significance of liquid-film

coefficients in gas absorption; ABSORPTION INTO A STAGNANT LIQUID; ABSORPTION INTO SURFACE OF TURBULENT LIQUID; PACKED ABSORPTION TOWERS; NONHOMOGENEOUS DISTRIBUTION OF SURFACE AGES; DERIVATION OF EXPRESSIONS FOR R IN VARIOUS TYPES OF SYSTEM; CONCLUSION; NOMENCLATURE
LITERATURE CITED Chapter B2. Kinetics of liquid-film processes in gas absorption. Part I: Models of the absorption process; The Three Models; Prediction of Effect of Physico-Chemical Factors; Discussion; References; Part II: Measurements of transTent absorption rates; Introduction; The Rotating Drum Method; Interpretation of Results; Comparison with Absorption in Packed Column; Conclusions; Acknowledgment; Nomenclature; References; Chapter B3. The kinetics of absorption of carbon dioxide into neutral and alkaline solutions; EXPERIMENTAL; RESULTS AND DISCUSSION; CONCLUSIONS APPENDIX I THE DEPLETION OF SODIUM HYDROXIDE AND BUFFER SOLUTIONS BY REACTIONNOTAION; REFERENCES; Chapter B4. Kinetics of CO2 absorption in alkaline solutions - I Transient absorption rates and catalysis by arsenite; EXPERIMENTAL METHOD; RESULTS; NOTATION; REFERENCES; Chapter B5. Kinetics of CO2 absorption in alkaline solutions-II. Absorption in a packed column and tests of surface renewal models; INTRODUCTION; EXPERIMENTAL; RESULTS; PREDICTION OF ABSORPTION RATES; DISCUSSION; CONCLUSIONS; NOTATION; REFERENCES; Chapter B6. Kinetics of CO2 absorption - III. First-order reaction in a packed column

Sommario/riassunto

A selection of papers many of which proved novel and thought-provoking and have had a considerable influence on the development of chemical engineering, chosen by Professor Danckwerts from research work conducted at Cambridge and Imperial College mainly during the years 1950-1954 and 1957-1973. They are divided into 6 sections with linking critical commentaries.
