Sommario/riassunto	"A history of Toronto's general hospital offers a window on a broader history of Upper Canada and Ontario over the last two centuries. In this account, J.T.H. Connor traces the hospital's two-hundred-year evolution, as its mandate to 'do good' forced constant adjustment to changing social, medical, and government attitudes." "This work is the most comprehensive analysis of any Canadian hospital or health care institution yet to appear. Using trustees' minutes, medical journals, newspapers, and government reports, along with correspondence, photographs, and reminiscences of trustees, nurses, doctors, and

patients, Connor offers acute observation and detailed analysis, as well as compelling character studies and revealing anecdotes. Broad in scope and meticulously executed, *Doing Good* brings vividly to life the day-to-day routines, the behind-the-scenes intrigue, and the people and politics of a great urban hospital."--Jacket.
