Sommario/riassunto

Each volume in the series focuses on a key area of rehabilitation medicine and breaks down the problems, treatments, and expected results into succinct facts, organized alphabetically and presented in bullet-point style for quick reference in the office or clinic. Whether the practitioner needs to look up a diagnostic question, neurorehabilitation complication, or sports intervention, this series provides the answers. Neuromuscular covers all major topics in pediatric rehabilitation and is comprised of eight sections covering mononeuropathies, polyneuropathies, the neuromuscular junction, motor
