Note generali	First published: Toronto : Macmillan of Canada, 1974.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Matter -- Contents -- Introduction to the Carleton Library Series The Politics of Development -- Revisiting -- Preface to the First Edition -- A Frontier of Monarchy -- The Manufacturing Condition -- Promoting New Ontario -- Claiming the "People's Share" -- Conserving the Forest -- Hydro As Myth -- Power Politics -- Joining the New Empire -- War and the Canadian Quandary -- Responsible Government Revisited -- Politics As Business -- The Image of the State -- A Note on Sources -- Index
Sommario/riassunto	The Carleton Library Series returns this classic in political economy and Canadian historical writing to print, with a new introduction by Robert Young. The Politics of Development reveals the full extent of state involvement in the exploitation of natural resources in the province of Ontario and the reciprocal impact resource development has had in shaping politics in the province. H.V. Nelles offers a revised staples interpretation, exposing the resource politics at the heart of central Canadian economic development. He explains the business history of

the forestry and mining industries from the mid-nineteenth through the mid-twentieth century, stressing the importance of public policy in their development. He offers a definitive interpretation of the emergence, development, and political dynamics of public ownership within the hydro-electric sector. Considered one of the seminal works on Canadian political economy *The Politics of Development* still has important things to say about public policy and will be of interest to historians, political scientists, economists, and those interested in environmental history.
