Sommario/riassunto	With more and more of the world's population projected to live in urban

areas, the life and death of cities has become a key factor in urban development considerations. This book attempts to bring an original contribution on the analysis of creating living cities. It advances the concept and framework of a "living city" and also explicates the key attributes of a "living city" that are increasingly critical to the reinvigoration and sustainable growth of cities. The book also seeks to document and compare Singapore's development as a "living city" with other cities around the world. Contr
