ISBN	1-283-14838-2 9786613148384 981-4299-63-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (144 p.)
Disciplina	616.898
Soggetti	Brain - Diseases Central nervous system - Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	CONTENTS; Acknowledgements; Preface; Chapter 1 Disease; Chapter 2 Arousal; Chapter 3 Parkinson's Disease; Chapter 4 Schizophrenia; Chapter 5 Perception; Chapter 6 Hallucinations; Chapter 7 Vestibular System; Chapter 8 Temporal Lobe Epilepsy; Chapter 9 Conclusion; Appendix; References; Index
Sommario/riassunto	The symptoms of schizophrenia have generated interest for more than two centuries. How are they produced? Where do they come from? In this highly stimulating book, Dr Locke proposes a new basic mechanism to account for many of the findings in schizophrenia. His ideas are based on observations and experiments at a State Psychiatric Hospital where he was the director of a Neurological Unit for ten years. He was struck by an outstanding sign of schizophrenia which had not attracted attention in the classical literature. Schizophrenia patients, he noticed, were too alert, too attentive. If this hy
