

1. Record Nr.	UNINA9910819994303321
Autore	Nielsen Søren Nors
Titolo	Sustainable development indicators : an exergy-based approach // Søren Nors Nielsen
Pubbl/distr/stampa	Boca Raton : , : CRC Press, , [2020]
ISBN	1-000-06137-X 0-429-28958-8 1-000-06143-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (238 pages) : illustrations
Collana	Applied ecology and environmental management
Disciplina	338.927072/3 338.9270723
Soggetti	Sustainable development - Denmark - Samsø Sustainable development - Research Exergy - Environmental aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Half Title -- Series -- Title -- Copyright -- Contents -- Foreword -- Preface -- Acknowledgements -- Author -- Reading Instructions -- 1. Introduction to Sustainability and Work Energy Analysis -- 1.1 Introduction to Sustainability Analysis -- 1.2 The Sustainability Concept -- 1.3 Sustainability-A Materialistic Definition -- 1.3.1 Energy Perspectives -- 1.3.2 Material Perspectives -- 1.4 Integrating with Physics -- 1.5 Thermodynamics and Society -- 1.6 Work Energy (Exergy) -- 1.7 Work Energy and Nature -- 1.7.1 Work Energy of Nature as Chemistry -- 1.7.2 Work Energy Including Information -- 2. Work Energy and Sustainability -- 2.1 Introduction to Work Energy -- 2.2 Introducing Energy Forms to Everyday Life -- 2.3 The Relevant Law(s) -- 2.4 Work Energy Content and Transformation Rules -- 2.5 Using Work Energy to Give Priorities -- 2.6 Sub-Conclusions Work Energy and Sustainability -- 3. Methodological Considerations -- 3.1 Introduction to Methodology -- 3.2 Basic Information on the Target of Study, Samsø -- 3.2.1 Samsø and the CLC System -- 3.3 Quantifying the Infrastructure -- 3.3.1 The Urban Fabric vs. the Rural Zone -- 3.3.2 Dividing the Infrastructure -- 3.3.3 The

Public Sector -- 3.3.4 Private Sector -- 3.3.5 Agricultural Sector --  
3.3.6 The Industrial Sector -- 3.3.7 Summary of the Distribution by  
Area of the Sectors -- 3.4 Work Energy of Energy and Materials -- 3.4.1  
Work Energy of Energy and Matter -- 3.4.2 Work Energy of  
Construction Materials and Houses -- 3.4.3 Work Energy of Chemicals  
and Elements -- 3.5 Other Elements of Methodology -- 3.5.1  
Geographical Issues and Landscape Perspective -- 3.6 Work Energy  
Methods in the Sectors -- 3.6.1 Energy Production and Consumption-  
Methodology -- 3.6.1.1 Energy Production and Consumption -- 3.6.1.2  
Energy Stocks in the Energy Sector -- 3.6.1.3 Energy Inflows to the  
Energy Sector.  
3.6.1.4 Work Energy Outflows from the Energy Sector -- 3.6.2 Public  
Societal Infrastructure and Methodology -- 3.6.2.1 Public Infrastructure  
and Work Energies -- 3.6.2.2 Stocks Work Energy of Public  
Infrastructure -- 3.6.2.3 Inflows of Work Energy to Public Infrastructure  
-- 3.6.2.4 Outflows of Work Energy from Public Infrastructure -- 3.6.3  
Private Households and Methodology -- 3.6.3.1 Energy and Private  
Households -- 3.6.3.2 Stocks of Work Energy in Private Households --  
3.6.3.3 Inflows of Work Energy to Private Households -- 3.6.3.4  
Outflows of Work Energy from Private Households -- 3.6.4 Agricultural  
Sector-Methodology -- 3.6.4.1 Work Energy and Agricultural Crops --  
3.6.4.2 Work Energy in Stocks of Agricultural Crops -- 3.6.4.3 Inflows  
to Agricultural Crops -- 3.6.4.4 Outflows from Agricultural Crops --  
3.6.4.5 Livestock and Work Energy -- 3.6.4.6 Livestock Stocks --  
3.6.4.7 Livestock Inflows -- 3.6.4.8 Livestock Outflows -- 3.6.4.9  
Forestry Crops and Work Energy -- 3.6.4.10 Fisheries and Work Energy  
-- 3.6.5 Industry, Trade and Commerce Sector and Methodology --  
3.6.5.1 Work Energy of the Industry, Trade and Commerce Sector --  
3.6.5.2 Stocks of Work Energy in Industry, Trade and Commerce Sector  
-- 3.6.5.3 Inflows of Work Energy in Industry, Trade and Commerce  
Sector -- 3.6.5.4 Outflows of Work Energy from Industry, Trade and  
Commerce Sector -- 3.6.6 Nature-Evaluation and Methodology --  
3.6.6.1 Work Energy Stock and Flows of Nature -- 3.6.6.2 Work Energy  
Stock of Nature -- 3.6.6.3 Work Energy Inflows to Nature -- 3.6.6.4  
Work Energy Outflows from Nature -- 3.7 Waste Management and  
Methodology -- 3.7.1 Waste Management and Energy -- 3.7.1.1 Work  
Energy Stocks of Wastes -- 3.7.1.2 Work Energy Inflows of Wastes --  
3.7.1.3 Work Energy Outflows of Wastes -- 3.8 Indices of Work Energy  
Efficiency of Society and Sectors -- 3.8.1 Stock Indicator.  
3.8.2 Renewability Indicator -- 3.8.3 Output/Input Efficiency -- 4.  
Analysis of the Energy Sector -- 4.1 Work Energy of Energy Sector --  
4.2 Energy Import and Production -- 4.3 Energy Export and  
Consumption -- 4.4 Sustainability Indicators -- 4.4.1 Stock Indicator  
-- 4.4.2 Renewability Indicator -- 4.4.3 O/I Indicator -- 4.5 Trends  
from 1997-2011 -- 4.6 Sub-Conclusions regarding the Energy Sector  
-- 5. Work Energy Analysis of the Public Sector -- 5.1 Introduction to  
Public-Sector Analysis -- 5.2 Work Energy of the Public Sector (Stock)  
-- 5.2.1 Renewable Energy-Bound Exergy Stocks (REBES\_PUBL) -- 5.2.2  
Non-Renewable Energy-Bound Exergy Stocks (NEBES\_PUBL) -- 5.2.3  
Renewable Matter-Bound Exergy Stocks (RMBES\_PUBL) -- 5.2.4 Non-  
Renewable Matter-Bound Exergy Stocks (NMBES\_PUBL) -- 5.3 Work  
Energy Inputs to the Public Sector -- 5.3.1 Renewable Energy-Bound  
Exergy Inputs (REBEI\_PUBL) -- 5.3.2 Non-Renewable Energy-Bound  
Exergy Inputs (NEBEI\_PUBL) -- 5.3.3 Renewable Matter-Bound Exergy  
Inputs (RMBEI\_PUBL) -- 5.3.4 Non-Renewable Matter-Bound Exergy  
Inputs (NMBEI\_PUBL) -- 5.4 Work Energy Outputs from the Public Sector  
-- 5.4.1 Renewable Energy Bound Exergy Outputs (REBEO\_PUBL) --  
5.4.2 Non-Renewable Energy-Bound Exergy Outputs (NEBEO\_PUBL) --

5.4.3 Renewable Matter-Bound Exergy Outputs (RMBEO\_PUBL) -- 5.4.4 Non-Renewable Matter-Bound Exergy Outputs (NMBEO\_PUBL) -- 5.5 Work Energy Balance of the Public Sector -- 5.6 Sustainability Indicators -- 5.6.1 Stock Indicator -- 5.6.2 Renewability Indicator -- 5.6.3 O/I Indicator -- 5.7 Sub-Conclusions regarding the Public -- 6. Work Energy and Private Sector -- 6.1 Work Energy and Private Households -- 6.2 Work Energy Stocks in Private Households -- 6.2.1 Renewable Energy-Bound Exergy Stocks (REBES\_PRIV) -- 6.2.2 Non-Renewable Energy-Bound Exergy Stocks (NEBES\_PRIV). 6.2.3 Renewable Matter-Bound Exergy Stocks (RMBES\_PRIV) -- 6.2.4 Non-Renewable Matter-Bound Exergy Stocks (NMBES\_PRIV) -- 6.3 Work Energy Inputs to Private Households -- 6.3.1 Renewable Energy-Bound Exergy Inputs (REBEI\_PRIV) -- 6.3.2 Non-Renewable Energy-Bound Exergy Inputs (NEBEI\_PRIV) -- 6.3.3 Renewable Matter-Bound Exergy Inputs (RMBEI\_PRIV) -- 6.3.4 Non-Renewable Matter-Bound Exergy Inputs (NMBEI\_PRIV) -- 6.4 Work Energy Outputs from Private Households -- 6.4.1 Renewable Energy-Bound Exergy Outputs (REBEO\_PRIV) -- 6.4.2 Non-Renewable Energy-Bound Exergy Outputs (NEBEO\_PRIV) -- 6.4.3 Renewable Matter-Bound Exergy Outputs (RMBEO\_PRIV) -- 6.4.4 Non-Renewable Matter-Bound Exergy Outputs (NMBEO\_PRIV) -- 6.5 Sustainability Indicators of Private Households -- 6.5.1 Stock Indicator of Private Households -- 6.5.2 Renewability Indicators of Private Households -- 6.5.3 O/I Indicator of Private Households -- 6.6 Sub-Conclusions regarding the Private Sector -- 7. Work Energy Analysis of the Agriculture, Forestry and Fisheries Sector -- 7.1 Introduction to Work Energy of the Agriculture and Related Sectors -- 7.2 Work Energy and Crop Production -- 7.2.1 Work Energy of Stocks in Crop Production -- 7.2.1.1 Renewable Energy-Bound Work Energy of Stocks in Crop Production (REBES\_CROP) -- 7.2.1.2 Non-Renewable Energy-Bound Work Energy of Stocks in Crop Production (NEBES\_CROP) -- 7.2.1.3 Renewable Matter-Bound Work Energy of Stocks in Crop Production (RMBES\_CROP) -- 7.2.1.4 Non-Renewable Energy-Bound Work Energy of Stocks in Crop Production (NMBES\_CROP) -- 7.2.2 Work Energy Inputs to Crop Production -- 7.2.2.1 Renewable Energy-Bound Work Energy of Inputs to Crop Production (REBEI\_CROP) -- 7.2.2.2 Non-Renewable Energy-Bound Work Energy of Inputs to Crop Production (NEBEI\_CROP) -- 7.2.2.3 Work Energy Input in Renewable Matter in Crop Production (RMBEI\_CROP). 7.2.2.4 Work Energy Input in Non-Renewable Matter in Crop Production (NMBEI\_CROP) -- 7.2.3 Work Energy Outputs in Matter from Crop Production -- 7.2.3.1 Work Energy Output in Renewable Energy from Crop Production (REBEO\_CROP) -- 7.2.3.2 Work Energy Output in Non-Renewable Energy from Crop Production (NEBEO\_CROP) -- 7.2.3.3 Work Energy Output in Renewable Matter from Crop Production (RMBEO\_CROP) -- 7.2.3.4 Work Energy Output in Non-Renewable Matter from Crop Production (NMBEO\_CROP) -- 7.2.4 Work Energy Budget of Crop Production -- 7.2.5 Sustainability Indicators of Crop Production -- 7.2.5.1 Stock Indicator of Crop Production -- 7.2.5.2 Renewability Indicators of Crop Production -- 7.2.5.3 O/I Indicator of Crop Production -- 7.3 Work Energy of Livestock Production -- 7.3.1 Work Energy Stocks of Livestock Production -- 7.3.1.1 Renewable Work Energies in Energy of Livestock Production (REBES\_LIVE) -- 7.3.1.2 Non-Renewable Work Energies in Energy of Livestock Production (NEBES\_LIVE) -- 7.3.1.3 Renewable Work Energies in Matter of Livestock Production (RMBES\_LIVE) -- 7.3.1.4 Non-Renewable Work Energies in Matter of Livestock Production (NMBES\_LIVE) -- 7.3.2 Work Energy Inputs of Livestock Production -- 7.3.2.1 Work Energy Input in Renewable Energy in Livestock Production (REBEI\_LIVE) -- 7.3.2.2 Work

Energy Input in Non-Renewable Energy in Livestock Production (NEBEI\_LIVE) -- 7.3.2.3 Work Energy Input in Renewable Matter in Livestock Production (RMBEI\_LIVE) -- 7.3.2.4 Work Energy Input in Non-Renewable Matter in Livestock Production (NMBEI\_LIVE) -- 7.3.3 Work Energy Outputs of Livestock Production -- 7.3.3.1 Work Energy Output in Renewable Energy from Livestock Production (REBEO\_LIVE) -- 7.3.3.2 Work Energy Output in Non-Renewable Energy from Livestock Production (NEBEO\_LIVE).  
7.3.3.3 Work Energy Output in Renewable Matter from Livestock Production (RMBEO\_LIVE).

---

Sommario/riassunto

Analyzing the self-sufficient Danish island of Sams, this book explains sustainability through a bio-geophysical understanding of how to best use society's limited resources to achieve true sustainability. The method used derives from the thermodynamic function of exergy. By analyzing exergy flows and establishing a system for evaluating the energy and the materials used in a society, the author creates a platform for monitoring certain indicators of sustainability. These indicators inform readers about the actions that must be taken and the time frames for achieving sustainability goals. The exergy-based approach is an important tool for carrying out such an analysis because it focuses on several key thermodynamic concepts and the usefulness of exergy analysis for evaluating sustainability. Explains sustainability by implementing thermodynamic laws to societal consumption and the use of resources. Discusses new methods that integrate energy and material fluxes and evaluates them against each other. Provides direct indicators for finding the largest problems/obstacles and deciding where measures should be taken. Includes instructions on how to establish an accounting system for evaluating the energy and the materials used in a society. This book is aimed for professionals, researchers, and students working on nature conservation and environmental management projects related to sustainability.
