1. Record Nr. UNISA996213072203316

Autore	Brecher Robert
Titolo	Torture and the ticking bomb / / Bob Brecher
Pubbl/distr/stampa	Malden, MA : , : Blackwell Publishing, , 2007
ISBN	1-119-43136-0 1-282-34843-4 9786612348433 0-470-69164-6 1-280-93277-5 9786610932771 1-4051-6201-5 0-470-69248-0 1-4051-8202-4
Descrizione fisica	1 online resource (134 p.)
Collana	Blackwell public philosophy
Disciplina	363.2 363.232
Soggetti	Torture Human rights
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (pages 89-116) and index.
Nota di contenuto	Torture and the Ticking Bomb; Contents; Preface; 1: Introduction; What is Torture?; Dershowitz on Interrogational Torture; Why Write about Torture?; The Agenda; 2: The Fantasy of the Ticking Bomb Scenario; Dershowitz's Argument and the Ticking Bomb; Who Tortures?; Effectiveness and Time; Knowledge and Necessity; The Ticking Bomb Scenario: Conclusion; 3: The Consequences of Normalizing Interrogational Torture; Some Clarifi cations; Three Positive Claims about the Consequences of Legalizing Interrogational Torture; The Institutionalization of Interrogational Torture; A Torturous Society 4: Torture, Death and PhilosophyTorture; Torture, Death and Interrogation; Why No Decent Society Can Torture; Torture, the ""War on Terror"" and Intellectual Irresponsibility; But What if Torture Really is the Only Possible Way to Avoid Catastrophe?; Two Final Points; Notes;

	Bibliography; Index
Sommario/riassunto	This timely and passionate book is the first to address itself to Harvard Law Professor Alan Dershowitz's controversial arguments for the limited use of interrogational torture and its legalisation.Argues that the respectability Dershowitz's arguments confer on the view that torture is a legitimate weapon in the war on terror needs urgently to be counteredTakes on the advocates of torture on their own utilitarian groundsTimely and passionately written, in an accessible, jargon-free styleForms part of the provocative and timely Blackwell Public Philosophy series

2. Record Nr. UNINA9910820047203321

Titolo	Computational mechanics materials and engineering applications : selected, peer reviewed papers from the 2011 International workshop on Computational Mechanics, Materials and Engineering Applications (CMMEA 2011), July 23-24, 2011, Kunming, China / / edited by Jianrong Yang and Min Yu
Pubbl/distr/stampa	Zurich, Switzerland : , : Trans Tech Publications, , 2012 ©2012
ISBN	3-03813-727-8
Descrizione fisica	1 online resource (331 p.)
Collana	Applied Mechanics and Materials, , 1662-7490 ; ; Volume 147
Altri autori (Persone)	YangJianrong YuMin
Disciplina	620.10285
Soggetti	Mechanics, Applied - Data processing Mechanics, Applied - Technological innovations Engineering - Data processing Materials science - Technological innovations Materials science - Data processing Materials - Technological innovations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and indexes.

Nota di contenuto

Computational Mechanics, Materials and Engineering Applications; Preface, Sponsors and Organizers; Table of Contents; Chapter 1: Building Materials; Using of Furfural to Modify the Ordinary Portland Cement; The Use of Stress Reduces in suddenly Changed Section of Rounded Shafts; Influence of Compressive Strength of Self-Compacting Concrete on Shear Behavior of Prestressed RC Beams; Strengthening of Concrete Beams Having Shear Zone Openings Using Orthotropic CFRP Modeling; Secondary Reinforcement in Concrete Corbel
Strength Properties of Recycled Aggregate Concrete Mixed with Polypropylene FiberStudy on the Behaviors of CFRP Confining Concrete Specimens Exposed to Fire, Acid and Alkaline Environments; Mechanical Properties of Concrete Added with Chicken Rachis as Reinforcement; Chapter 2: Computational Mechanics and Engineering Applications; Chongqing Bridge and its Combination Bridge; The Sustainable Indoor Environment Research and Design of Earth Buildings for Rural People; Concrete Bridge Durability Design and Maintenance
Structural Analysis of the First Iron Bridge in the World Using the Finite Element MethodDeflection Analysis of Sleeve Jointed Purlin Systems with Non-Linear Rotational Stiffness; Application of Genetic Programming for Estimation of Soil Compaction Parameters; Experimental Study on the Effect of Froude Number on Temporal Variation of Scour around a T Shaped Spur Dike in a 90 Degree Bend; Comparing Steel Plate Shear Wall Behavior with Simple and Corrugated Plates; Safety Evaluation of Pier under Impact of Bridge Girder Erection Machine
Three Dimensional, Linear and Nonlinear Finite Element Modeling of FRP to Concrete Pull-Off TestComparative Analysis of Axially Loaded Composite Columns; Study on the Effect of Sewage Concentration on Treatment Efficiency of Artificial Wetland of Plateau Lake; Singular Perturbation Method for Solving Non-Linear Vibration of Stay Cable (I) - Theory Research; Singular Perturbation Method for Solving Non-Linear Vibration of Stay Cable (II) - Engineering Application; Double Non-Linear Mechanical Characteristics of Transmission Tower Structure Based on Model Amendment
An Experimental Study on Material and Structural Properties of Structural Insulated Panels (SIPs)Study and Practice on the Performance of Soundproofing for Office Building Wall; Symplectic Solutions in Singularity Problems of Anisotropic Beams; The Finite Element Analysis on Mechanical Properties of the Meridians Stair Skeleton of Medical Exhibition Center in Taizhou City; Structural Defects of Existing RC Buildings in Eskisehir Province; Reliability Assessment of Fatigue Life of Hangers in Large-Span Suspension Bridges
Maintenance Strategies of Main Cable for Large Span Suspension Bridges Considering Different Scales

Sommario/riassunto

Following the great progress made in Computational Mechanics and Materials, the 2011 International Workshop on Computational Mechanics, Materials and Engineering Applications (CMMEA 2011) aimed at providing a forum for the presentation and discussion of state-of-the-art developments in Computational Mechanics and Engineering Applications, Building Materials, Geotechnical & Soil Engineering and Materials Science and Engineering Applications. The emphasis was placed on basic methodologies, scientific developments and engineering applications. Review from Book News Inc.: This publication consists
