Sommario/riassunto

Since the attempt to unite two parts of a country divided for four decades yielded contradictory results, this volume provides a balance sheet of the successes and failures of German unification during the first quarter century after the fall of the Wall. Five themes, ranging from the transfer of political institutions to the economic crisis, from the social upheaval for women's movements to the cultural efforts at interpretation and the changes in foreign policy have been chosen to illustrate the complexity of the process.
