   Sommario/riassunto   This text analyzes the emergence of the modern novel and the manner
                          in which it mirrors the underlying process of the globalization of
                          culture. It focuses on Hardy's "The Mayor of Casterbridge", Conrad's
                          "Lord Jim", Achebe's "Things Fall Apart" and Vargas Llosa's "The War at
                          the End of the World".
