Sommario/riassunto	The politics and economics of the United States are wedded in the political economy of the nation state and the nationalist economic policies. This `nationalist paradigm' is, however, showing the following signs of fatigue: the role of the nation state is diminishing as the economy globalizes; US national accounting systems are less effective, technology forces change; trading blocs are emerging; there is less control of exchange rates; regional economies are restructuring; and

competitive environments are changing. This book proposes that
political jurisdictions are not economies but polities
