| Sommario/riassunto | Bishops were central figures in medieval society and the circumstances of their appointments are of great historical importance. This book considers the theory and practice of free canonical election in its heyday under Henry III and Edward I, and the nature of and reasons for the subsequent transition to papal provision. An analysis of the theoretical evidence for this subject (including canon law, royal pronouncements and Lawrence of Somercote's remarkable 1254 tract on episcopal elections) is combined with a consideration of the means by which bishops were created during the reigns of Henry |
