Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	part I. The age of election -- part II. The age of provision -- part III. The European context.
Sommario/riassunto	Bishops were central figures in medieval society and the circumstances of their appointments are of great historical importance. This book considers the theory and practice of free canonical election in its heyday under Henry III and Edward I, and the nature of and reasons for the subsequent transition to papal provision. An analysis of the theoretical evidence for this subject (including canon law, royal pronouncements and Lawrence of Somercote's remarkable 1254 tract on episcopal elections) is combined with a consideration of the means by which bishops were created during the reigns of Henry

Nota di contenuto	Overview of Operational Agrometeorological Services in India -- Agromet Services for Sustainable Cropping Systems -- Spring Frost Risk in Orchards: Forecast and Protection Methods -- Climate Field Schools for Supporting Food Security Programme in Indonesia.
Sommario/riassunto	This book offers perspectives on more productive, sustainable and resilient modes of agriculture. The chapters highlight successful, evidence-based local and regional practices across the globe that are resulting in more sustainable and viable methods of farming, particularly important within the context of weather variability and climate change. The efficient use of weather and climate services for agricultural applications are fundamental to these efforts. In the past, weather and climate services have not been used to their fullest potential for developing sustainable agriculture. But now more than ever, as this book documents, agrometeorology is an essential tool for current and future food production and security around the world. This book offers strategic recommendations for strengthening the role and availability of agrometeorological services around the globe.
