Description based upon print version of record.

In the first half of 2003, severe acute respiratory syndrome (SARS) struck China (including Hong Kong), causing panic and claiming manylives. The unknown nature of SARS at that time also jolted theeconomic growth of China and Hong Kong, disrupted the social life oftheir citizens and created much stress and strain for their politicalsystems and governance. Like other major crises, the management of theSARS crisis provides a good opportunity to examine
the strengths andweaknesses of the political systems in China and Hong Kong. From theoutset, scholars at the East Asian Institute (EAI) followed c
