Sommario/riassunto	A Dan Josselyn Memorial Publication Among southeastern Indians pottery was an innovation that enhanced the economic value of native foods and the efficiency of food preparation. But even though pottery was available in the Southeast as early as 4,500 years ago, it took nearly two millenia before it was widely used. Why would an innovation of such economic value take so long to be adopted? The answer lies in the social and political contexts of traditional cooking technology.
