Sommario/riassunto

Africa's Information Revolution presents an in-depth examination of the development and economic geographies accompanying the rapid diffusion of new ICTs in Sub-Saharan Africa. Represents the first book-length comparative case study ICT diffusion in Africa of its kind  
Confronts current information and communication technologies for development (ICT4D) discourse by providing a counter to largely optimistic mainstream perspectives on Africa's prospects for m- and e-development  
Features comparative research based on more than 200 interviews with firms from a manufacturing and service industry
