

1. Record Nr.	UNINA9910820473403321
Autore	Tempelaars Stan <1938->
Titolo	Signal processing, speech and music // Stan Tempelaars
Pubbl/distr/stampa	London : , : Routledge, , 2014
ISBN	1-136-64676-0 0-203-05948-4 0-585-36744-2
Descrizione fisica	1 online resource (349 p.)
Collana	Studies on new music research Signal processing, speech, and music
Disciplina	621.382/8
Soggetti	Signal processing - Digital techniques Music - Data processing Speech processing systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	<p>""Cover""; ""Half Title""; ""Title Page""; ""Copyright Page""; ""Table of Contents""; ""Preface""; ""CHAPTER 1 Acoustical Communication""; ""CHAPTER 2 Functions""; ""2.1 Registrations and signal functions""; ""2.2 Exponential and logarithmic functions""; ""A. The definition of the exponential function""; ""B. Applications of exponential functions""; ""1. The energy of a signal function""; ""2. The notation of numbers""; ""3. Exponential decay""; ""4. Well-tempered tuning""; ""C. The logarithm""; ""D. An important application of the logarithm: the decibel""; ""2.3 Differentiating functions""</p> <p>""A. The differential quotient""""B. Displacement, speed and acceleration""; ""C. Rules for differentiation (1)""; ""D. Differentiation without differential quotient""; ""1. Differentiating network""; ""2. Differentiating numerically""; ""E. Rules for differentiation (2)""; ""2.4 Equations""; ""A. Algebraic equations""; ""B. Difference and differential equations""; ""2.5 The integration of functions""; ""A. Integral and mean value""; ""B. Rules, integrating network, integrating numerically""; ""C. The RMS value of an asymmetrical signal""</p> <p>""2.6 Sinusoidal vibrations and trigonometric functions""""A. Sine function and sinusoidal movement""; ""B. Time-discrete sine functions""; ""C. The importance of sinusoidal vibrations""; ""D.</p>

Trigonometric functions"; "E. Sinusoidal signals"; "2.7 Problems";  
"CHAPTER 3 The Harmonic Oscillator"; "3.1 Undamped vibrations -  
the time-continuous case"; "A. The vibrating string; equation and  
solution"; "B. Other harmonic oscillators"; "1. Systems with a  
constant Vibration period"; "2. The Helmholtz resonator"; "3. The  
LC-circuit"  
"3.2 The undamped Vibration - the time-discrete case" "A. A simple  
programmed sinewave oscillator"; "B. The a€?look-up tablea€?  
generator"; "C. A digital sinewave oscillator with feedback"; "3.3  
Damped vibrations - the time-continuous case"; "A. Equation and  
solution"; "B. The damping factor"; "C. Electrical and mechanical  
systems"; "3.4 Damped vibrations - the time-discrete case"; "3.5  
Forced vibrations - the time-continuous case"; "A. The equation and  
the solution"; "B. The amplitude of the forced Vibration"; "C. Analysis  
of the filter behaviour"  
"1. The Q-factor" "2. Time-domain interpretation of Q"; "3.  
Frequency domain interpretation of Q"; "D. Global characterization of  
the resonance curve"; "E. The phase behaviour"; "F. Energy  
dissipation"; "3.6 Forced vibrations in a time-discrete system"; "A.  
Equation and Solution"; "B. A digital filter"; "3.7 Problems";  
"CHAPTER 4 Signal Functions in the Time and Frequency Domains";  
"4.1 The Computer; binary number representation and  
programming"; "4.2 Time-discrete signal functions"; "A. Linear Pulse  
Code Modulation"; "1. Analog to digital conversion"  
"2. Quantization noise"

---

Sommario/riassunto

First published in 1996. Routledge is an imprint of Taylor & Francis, an  
informa company.
