| Sommario/riassunto | The world is experiencing a data revolution. The idea is that data can be used to drive and support development in both the public and the private sectors. This trend, I believe, has major implications for the records and archives profession. The Records Management Journal is taking a lead in initiating debate on this issue, recognizing that the records management community has an important role to play in the move toward Open Data and Big Data Analytics. If records managers can bring their skills and experience to the challenges of managing and protecting data integrity through time, they wil |
