Sommario/riassunto	Can one explain the power of global capitalism without attributing to capital a logic and coherence it does not have? Can one account for the powers of techno-science in terms that do not merely reproduce its own understanding of the world? Rule of Experts examines these questions through a series of interrelated essays focused on Egypt in the twentieth century. These explore the way malaria, sugar cane, war, and nationalism interacted to produce the techno-politics of the modern Egyptian state; the forms of debt, discipline, and violence that founded the institution
