

1. Record Nr.	UNINA9910820555503321
Autore	Koerner David
Titolo	Here be dragons : the scientific quest for extraterrestrial life // David Koerner, Simon LeVay
Pubbl/distr/stampa	Oxford, [England] ; ; New York, New York : , : Oxford University Press, , 2000 ©2000
ISBN	0-19-773229-1 0-19-803337-0 1-280-83117-0 0-19-535175-4
Descrizione fisica	1 online resource (281 p.)
Disciplina	576.8/39
Soggetti	Life on other planets Life - Origin
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Contents; Acknowledgments; Introduction; 1 Origins: How Life on Earth Began; 2 Going to Extremes: The Habitats and Requirements for Life; 3 The Incredible Shrinking Martians: Searching for Life in the Solar System; 4 The Death and Life of Stars: Organic Molecules and the Evolution of Solar Systems; 5 The Planet Finders: Searching for Life Beyond the Sun; 6 What Happens in Evolution? Chance and Necessity in the Origin of Biological Complexity; COLOR PLATES; 7 SETI: The Search for Extraterrestrial Intelligence; 8 Dreamland: The Science and Religion of UFOs; 9 Exotica: Life as We Don't Know It 10 Many Worlds: Cosmology and the Anthropic Principle Conclusions; Notes; Index
Sommario/riassunto	The discovery of life on other planets would be perhaps the most momentous revelation in human history, more disorienting and more profound than either the Copernican or Darwinian revolutions, which knocked the earth from the center of the universe and humankind from its position of lofty self-regard. In Here Be Dragons, astronomer David

Koerner and neurobiologist Simon LeVay offer a scientifically compelling and colorful account of the search for life beyond Earth. The authors survey the work of biologists, cosmologists, computer theorists, NASA engineers, SETI researchers, roboticists, and U
