

1. Record Nr.	UNINA9910820589903321
Autore	Pietsch Theodore W
Titolo	Oceanic anglerfishes [[electronic resource] ] : extraordinary diversity in the deep sea // Theodore W. Pietsch
Pubbl/distr/stampa	Berkeley, : University of California Press, c2009
ISBN	1-283-27715-8 9786613277152 0-520-94255-8
Descrizione fisica	1 online resource (571 p.)
Disciplina	597/.62
Soggetti	Anglerfishes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 527-545) and index.
Nota di contenuto	Frontmatter -- CONTENTS -- PREFACE -- ACKNOWLEDGMENTS -- 1. Introduction and Historical Perspective -- 2. What Makes an Anglerfish? -- 3. Biodiversity -- 4. Evolutionary Relationships -- 5. Geographic Distribution -- 6. Bioluminescence and Luring -- 7. Locomotion, Food, and Feeding -- 8. Reproduction and Early Life History -- Introduction -- Families, Genera, and Species of the Ceratioidei -- REALLOCATION OF NOMINAL SPECIES OF THE CERATIOIDEI BASED ON FEMALES -- REALLOCATION OF NOMINAL SPECIES OF THE CERATIOIDEI BASED ON FREE-LIVING MALES -- SYMBOLIC CODES FOR INSTITUTIONAL COLLECTIONS -- GLOSSARY -- REFERENCES -- ILLUSTRATION CREDITS -- INDEX
Sommario/riassunto	No environment on Earth imposes greater physical and biological constraints on life than the deep oceanic midwaters. Near-freezing temperatures, the absence of sunlight, enormous pressure, and a low food supply make habitation by any living thing almost inconceivable. Yet 160 species of anglerfishes are found there in surprising profusion. Monstrous in appearance, anglerfishes possess a host of unique and spectacular morphological, behavioral, and physiological innovations. In this fully illustrated book, the first to focus on these intriguing fish, Theodore W. Pietsch delivers a comprehensive summary of all that is known about anglerfishes-morphology, diversity, evolution, geographic distribution, bioluminescence, and reproduction.
