

1. Record Nr.	UNINA9910455765703321
Titolo	Access 2003 VBA programmer's reference [[electronic resource] /] / Patricia Cardoza ... [et al.]
Pubbl/distr/stampa	Hoboken, NJ, : Wiley, c2004
ISBN	1-280-28681-4 9786610286812 0-7645-7166-4
Edizione	[1st edition]
Descrizione fisica	1 online resource (982 p.)
Collana	Programmer to programmer
Altri autori (Persone)	CardozaPatricia
Disciplina	005.75/65
Soggetti	Database management Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	About the Authors; Acknowledgments; Foreword; Introduction; Chapter 1: Introduction to Microsoft Access; Why Use Microsoft Access?; Is Access the Only Database I'll Ever Need?; Microsoft Access; MSDE; SQL Server; Automating Microsoft Access Without VBA Code; The Database Wizard; Creating a Switchboard for Your Database; Begin at the Beginning; Create a Switchboard through the Switchboard Manager; Add and Configure Controls Using Wizards; Building Automation into Your Project; Using Expression Builder; Using the Macro Builder; Using the Code Builder; Summary; Chapter 2: Access, VBA, and Macros VBA within Access Writing Code within Modules; VBA versus Macros in Access; Macros in Access 2003; Advantages to Using VBA over Macros; Summary; Chapter 3: New Features in Access 2003; Easy Upgrading; Database Structure and Management; Find Object Dependencies; Form/Report Error Checking; Propagate Field Properties; Customize SQL Font; Get Context-Sensitive SQL Help; Backup Database/Project; Sorting Option on Lookup Wizard; Copy and Paste Linked Table as Local Table; Notable Mention; New Wizards and Builders and Managers; A Wizard for Every Occasion; Available Builders; Managers Changes to Jet Service Pack 8; Security and Related Features; What Is Macro Security? And Why Are We Talking about Macros?; Digital Signatures; Expression Sandbox; End-User Enhancements; Pivot Charts;

Windows XP Theming; Templates; Smart Tags; Auto Correct Options
Buttons; Better Accessibility; XML and Access; Relating XML to HTML;
The Advantages of XML; Using Access 2003 with SharePoint Services;
Export Information to a SharePoint Server; Import Information From a
SharePoint Server; Access Developer Extensions; The Property Scanner;
The Custom Startup Wizard; The Package Wizard; Summary
Chapter 4: VBA Basics VBA Objects; Objects; Methods; Events; Variables
and VBA Syntax; Variables; Other VBA Structures; Comments; Line
Continuation; Constants; Enums; Summary; Chapter 5: Using the VBA
Editor; Anatomy of the VBA Editor; Your Access Database and VBA
Project-Better Together; Using the Object Browser; Testing and
Debugging VBA Code; Summary; Chapter 6: Using DAO to Access Data;
Direct Access Objects; Why Use DAO?; Referring to DAO Objects;
Default Collection Items; The DBEngine Object; The Workspaces
Collection; The Errors Collection; The Databases Collection
The Connections Collection DAO Object Properties; DAO Property
Types; Creating Schema Objects with DAO; Managing Jet Security with
DAO; Creating Security Objects; Managing Users and Groups; Managing
Passwords; Managing Permissions; Data Access with DAO; Working with
Query Defs; Working with Record sets; Filtering and Ordering Record
sets; Navigating Record sets; Bookmarks and Record set Clones;
Finding Records; Working with Record sets; Summary; Chapter 7: Using
ADO to Access Data; Ambiguous References; Referring to ADO Objects;
Default Collection Items; Connecting to a Data Source
Specifying a Cursor Location

Sommario/riassunto

What is this book about? Its power and short learning curve have made Access Microsoft's leading consumer relational database management system for desktop applications. VBA lets you tap more of that power, responding to application level events, displaying forms and reports, manipulating toolbars, and much more. In this book, a crack team of programmers, including two Microsoft MVPs, shows you how to take control of Access 2003 or 2002 using VBA. You'll learn to create and name variables, use DAO and ADO to manipulate data, handle errors correctly, create classes and use APIs, and

Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages 103-124) and index.
Nota di contenuto	1. Introduction -- 2. The global airline industry -- 3. Industry organization -- 4. External forces affecting air carrier operations -- 5. Government involvement in airline operations -- 6. Opportunities and challenges for the industry -- Notes -- References -- Index.
Sommario/riassunto	<p>The airline industry is one of the most fascinating in the world, with roots going back to the earliest years of the 20th century. Not long after the Wright brothers flew successfully for the first time in 1903, interest in aviation for military and commercial purposes began. In the late teens, the U.S. government began offering potentially lucrative airmail contracts to start-up air carriers, who competed vigorously for them often with disastrous results. Despite the rocky start, the carriers persevered and, by the 1930s, were beginning to look like the companies we see today. This book will provide the reader insight into the nature of the airlines and why companies promulgate the strategies they do. First, the history of commercial air services will be examined, with an initial focus on the United States. After this background, airline operations around the world will be compared and the different types of carriers that comprise the industry will be discussed. Next, the reader will learn about important uncontrollable outside forces (fuel costs, terrorism, economic conditions, etc.) that can have dramatic and potentially devastating impacts on an airline. A discussion of economic regulation and deregulation will follow to help the reader understand the impact of both legislate actions on the carriers operating today. Finally, in the face of expected increases in the demand for the global</p>

movement of passengers and cargo, future opportunities and challenges facing the airline industry will be presented.
