HEALTHY RELATIONSHIP WITH MONEY; 20. FIRE IN THE BELLY; ABOUT THE AUTHOR; ABOUT OAK TREE PRESS; NUBOOKS
Sommario/riassunto	Successful entrepreneurs are neither unique nor especially gifted but they are special. They are special because they have made themselves special. They have worked on their skills. I believe that all of the core skills as exhibited by entrepreneurs are learnt disciplines, not a preordained quality that somehow depends on our genetic makeup. From my experiences in writing the book, Grabbing the Oyster!, I have documented the characteristics that all successful entrepreneurs exhibit to some degree. I believe these characteristics provide an excellent yardstick by which to evaluate your perso

2. Record Nr.	UNINA9910820631303321
Autore	Latimer Karen

Sommario/riassunto

The information society and the information age are changing library services as well as library premises. This raises questions about what needs to be considered when planning and designing new library buildings in order to achieve attractive, efficient and future-oriented new library spaces. This new publication provides information and guidelines for the building planning process, whether you are planning a new public or academic library building. It reflects on fundamental issues, on new development trends and on the planning process. The library building process is seen from both the library manager's perspective as well as that of the architect and designer. Issues covered include what to consider when investigating the need for space, library design from a marketing viewpoint, green management and sustainability relating to library buildings and a layman's guide to reading plans. This publication and the IFLA guidelines provided are not seen as a traditional set of recommendations to be rigidly adhered to since this would be unrealistic in a fast-changing and global context. Rather, library managers and architects should read them in order to inform their thinking on key issues and establish a planning programme. They must then relate them to their own countries and circumstances by making the relevant local adjustments.
