

1. Record Nr.	UNINA9910820761903321
Titolo	Delta waters : research to support integrated water and environmental management in the lower Mississippi River // Committee on Strategic Research for Integrated Water Resources Management, Water Science and Technology Board, Division on Earth and Life Studies, National Research Council of the National Academies
Pubbl/distr/stampa	Washington, District of Columbia : , : The National Academies Press, , [2013] ©2013
ISBN	0-309-29219-0 0-309-29217-4
Descrizione fisica	1 online resource (128 p.)
Disciplina	551.48
Soggetti	Deltas Environmental management Mississippi River Delta (La.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Front Matter""; ""Acknowledgments""; ""Preface""; ""Contents""; ""Summary""; ""1 Introduction""; ""2 Lower River and Deltaic Systems: Common Problems and Challenges""; ""3 Strategic Research for Integrated Water and Environmental Management""; ""4 Science-Policy Analysis: An Emerging Research Frontier""; ""5 Research Coordination and Institute Planning""; ""6 Comparative International Deltaic Research: Transferring and Applying Knowledge""; ""References""; ""Appendix A: Guest Speakers at Committee Meetings""; ""Appendix B: Biographical Sketches of Committee Members and Staff""
Sommario/riassunto	"The Water Institute of the Gulf is a not-for-profit, independent research institute dedicated to advancing the understanding of coastal, deltaic, river and water resource systems, both within the Gulf Coast and around the world. Their mission supports the practical application of innovative science and engineering, providing solutions that benefit society. Those who make policy for coastal and deltaic systems, as well

as managers of natural resources, need high-quality science and engineering to guide their decisions. The Water Institute of the Gulf began operations in 2012 to address exactly this sort of challenge. Delta Waters offers advice to The Water Institute of the Gulf that it might use as part of its strategic planning process. This report focuses on strategic research to support integrated water resources management in the lower Mississippi River delta and includes international comparative assessments. The recommendations of Delta Waters promote a human and environmental systems approach to scientific research that supports integrated water and environmental resources management in the lower Mississippi River and delta, and offers ideas regarding comparative assessments with other, relevant deltaic regions around the world. This report provides input for research into common deltaic problems and challenges, identifies strategic research for The Water Institute of the Gulf, and suggests ways that the organization can utilize knowledge gained from the lower Mississippi River and delta system in developing a research program to support water management decisions in other large river/delta complexes."--Publisher's description.
