Sommario/riassunto	This book provides in depth coverage of the major psychosocial and stress process theories and interventions, and explores how these models and techniques can be applied to rehabilitation populations. In addition, the book covers important issues in the adjustment process of persons with disabilities and chronic illness (e.g., stigma, societal attitudes, sexuality), and offers chapters that explore psychosocial adjustment within the context of positive psychology, psychiatric rehabilitation, and persons with substance abuse issues. Finally, the chapters are written from an evidence-based pract
