## Sommario/riassunto

A Dan Josselyn Memorial Publication Until recently, archaeological projects that included analysis of human remains had often lacked active collaboration between archaeologists and physical anthropologists from the planning stages onward. During the 1980's, a conjunctive approach developed; known as "bioarchaeology," it draws on the methodological and theoretical strengths of the two subdisciplines to bridge a perceived communications gap and promote a more comprehensive understanding of prehistoric and historic cultures. This volume addresses questions
