Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Front Matter -- Contents -- Transformations -- Wonder -- Being Real -- Violence -- Truth -- The Learner -- The Student -- The Child -- Conflict and Coherence -- Origins -- Index
Sommario/riassunto	Author Michael Gelven suggests that thinking metaphysically transforms us, and consequently the nature of metaphysics itself is transformational. Using concrete existential phenomena such as the learning process, how children mature into adults, and how fear can develop into courage, he establishes an understanding of metaphysical transformation.
