Sommario/riassunto

The world has been brought to its knees in recent years due to an increased amount of hurricanes, tsunamis and earthquakes which collectively have left tens of millions without power and derailed economic growth in the process. However, today weather is not the only threat to massive power loss. It's time to fight back before energy weaknesses and instabilities from disruptive weather patterns cause financial chaos around the world through cyberwarfare. In Lessons from Frankenstorm, you'll learn how to fight back. Overview: A look back at recent events (Fukushima, India blackou
