

1. Record Nr.	UNINA9910821248203321
Autore	Rykov Vladimir
Titolo	Stochastic models in survival analysis and reliability set . Volume 1 Reliability of engineering systems and technological risk // Vladimir Rykov
Pubbl/distr/stampa	London, England ; ; Hoboken, New Jersey : , : ISTE : , : Wiley, , 2016 ©2016
ISBN	1-119-34719-X 1-119-34741-6
Edizione	[First edition]
Descrizione fisica	1 online resource (233 pages) : illustrations, graphs
Collana	Mathematics and Statistics Series
Disciplina	620
Soggetti	Engineering systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	In this book three main aspects are considered together: mathematical models for engineering systems reliability, the main concepts for technogeneuous risk study, and insurance as methods for risks management. In the first part the author considers some special statistical problems concerning reliability data elaboration. The second part deals with the strong mathematical concept of risks and some problems for technogeneuous risks insurance.
