Sommario/riassunto	"'Participatory Practice in Space, Place, and Service Design' is premised on a belief in the importance of participatory practices in finding creative solutions to the plethora of problems we face today. It argues that engaging professions with the public in mutual exploration, analysis, and creative thinking is essential. It not only ensures better quality products, places, services, and a greater sense of civic agency but also facilitates fuller access to them and the life opportunities they can unleash" -- publisher's description.
