Sommario/riassunto	Hausa society in West Africa has attracted researchers' attention for decades, and has featured in the historical record for at least 500 years. Yet, no clear picture is available of the historical trajectories that

underpin Hausa ethnogenesis. This book addresses this gap, deploying interdisciplinary approaches to revisit questions to which single disciplines have given partial answers, often due to the paucity of written sources for early periods of Hausa history. Contributors draw from the disciplines of anthropology, linguistics, economic history, and archaeology to enquire into how a 'Hausa' identity took shape and what have been its changing material and cultural manifestations. The result is a compelling overview of one of the most iconic groups of modern West Africa.
