language varieties, racialized identities, and the biased educational

practices of settler schools. The book aims to develop awareness of the colonial past and its present-day influences on settler schools; to take a close look at the effects of present-day settler nationalism on constructions of race and language in settler schools; and to explore what could be done differently to lessen present-day and future educational inequity. The book will have great appeal to education students, educators, teacher educators, and educational researchers in settler contexts.
