Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Conservative ideology and social change -- American conservatism before Ronald Reagan -- Reagan, George H.W. Bush, and social conservatism -- Social conservatism and the Republican Party from 1993 to the present -- The progressive conservatives and the boundaries of politics -- Social conservatives and the Reform Party of Canada -- Social conservatives and the unified Canadian right -- Conclusion.
Sommario/riassunto	"The strength of the Tea Party and Religious Right in the United States, alongside the Harper Conservatives' stance on same-sex marriage and religious freedom in Canada, has many asking whether social conservatism has come to define the right wing of North American politics. In this timely and penetrating book, James Farney provides the first full-length comparison of social conservatism in Canada and the United States from the sexual revolution to the present day. Based on archival research and extensive interviews, it traces the historic relationship between social conservatives and other right-wing groups. Farney illuminates why the American Republican Party was quicker to

accept social conservatives as legitimate and valuable allies than the Conservative Party of Canada. This book will be indispensable for understanding why a movement so powerful among American conservatives has been distinctively less important in Canada and how the character of Canadian conservatism means it will likely remain so." --Publisher's website.

work" as a concept for studying professionalization processes in the interpreting field -- The task of the interpreter in the struggle of the other for empowerment -- Index.

Sommario/riassunto

This volume contributes to the emerging research on the social formation of translators and interpreters as specific occupational groups. Despite the rising academic interest in sociological perspectives in Translation Studies, relatively little research has so far been devoted to translators' social background, status struggles and sense of self. The articles assembled here zoom in on the "groups of individuals" who perform the complex translating and/or interpreting tasks, thereby creating their own space of cultural production. Cutting across varied translatorial and geographical arenas, they reflect a view of the interrelatedness between the macro-level question of professional status and micro-level aspects of practitioners' identity. Addressing central theoretical issues relating to translators' habitus and role perception, as well as methodological challenges of using qualitative and quantitative measures, this endeavor also contributes to the critical discourse on translators' agency and ethics and to questions of reformulating their social role. The contributions to this volume were originally published in Translation and Interpreting Studies 4:2 (2009) and 5:1 (2010).
