Sommario/riassunto

Arthur Lyon Bowley, the founding father of modern statistics, was an important and colorful figure and a leader in cementing the foundations of statistical methodology, including survey methodology, and of the applications of statistics to economical and social issues during the late 19th and early 20th centuries. In many respects, he was ahead of his time. The giants in this field around that time were largely concentrated in the British Isles and Scandinavian countries; among these contributors, Arthur Bowley was one of the most active in revolutionizing statistical methodology and its econo

Sommario/riassunto	In 'Another Jerusalem': Political Legitimacy and Courtly Government in the Kingdom of New Spain (1535-1568) José-Juan López-Portillo offers a new approach to understanding why the most densely populated and culturally sophisticated regions of Mesoamerica accepted the authority of Spanish viceroys. By focusing on the routines and practices of quotidian political life in New Spain, and the ideological affinities that bound indigenous and non-indigenous political communities to the viceregal regime, López Portillo discloses the formation of new loyalties, interests and identities particular to New Spain. Rather than the traditional view of European colonial domination over a demoralized indigenous population, New Spain now appears as Mexico City's sub-empire: an aggregate of the Habsburg 'composite

monarchy'. "Embellished with wonderful illustrations, this work draws upon extensive secondary and primary sources. Scholars studying Spain's America will find it a thoughtful addition to historical literature on 16th-century New Spain." M. A. Burkholder, University of Missouri - St. Louis , CHOICE, July 2018 Vol. 55 No. 11
