Sommario/riassunto

This detailed examination of contemporary Iran addresses the most important current social, political, and economic issues facing the nation and the way it is perceived by the outside world. The volume brings together some of the most important scholars and researchers in the field, working in such diverse disciplines as anthropology, economics, history, international relations, philosophy, political science, and sociology, to offer a broad range of perspectives on the significance of three decades of changes for Iran's current and near-term-future domestic and international politics.<P
