Record Nr. UNINA9910821520203321 Microneedle-mediated transdermal and intradermal drug delivery / / **Titolo** Ryan F. Donnelly ... [et al.] Pubbl/distr/stampa Chichester, West Sussex, : Wiley-Blackwell, 2012 **ISBN** 1-119-95966-7 1-283-43251-X 9786613432513 1-119-95968-3 1-119-95965-9 Edizione [2nd ed.] Descrizione fisica 1 online resource (212 p.) Altri autori (Persone) DonnellyRyan F Disciplina 615.1/9 Soggetti Microinjections Transdermal medication Drug delivery systems Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Description based upon print version of record. Note generali Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Transdermal drug delivery -- Microneedles: design, microfabrication and optimization -- Microneedle applicator designs for transdermal drug delivery applications -- Transdermal delivery applications --Microneedle-mediated intradermal delivery -- Clinical application and safety studies of microneedles -- Microneedles : current status and future perspectives. One of the latest techniques in drug delivery, microneedles are used for Sommario/riassunto administering a wide range of drug substances used to treat various medical conditions. Thorough background information is included providing a history of the field. Various methods used to produce micorneedles are described as well as a snapshot of the future directions within the industry. Written by highly qualified authors, this new text is the only title providing a comprehensive review of microneedle research in the fields of transdermal and intradermal drug

delivery.
