

1. Record Nr.	UNINA9910821536703321
Titolo	Gesture and the dynamic dimension of language : essays in honor of David McNeill // edited by Susan D. Duncan, Justine Cassell, Elena Levy
Pubbl/distr/stampa	Philadelphia, : J. Benjamins Pub. Co., c2007
ISBN	1-282-15462-1 9786612154621 90-272-9250-7
Edizione	[1st ed.]
Descrizione fisica	vi, 328 p
Collana	Gesture studies ; ; v. 1
Altri autori (Persone)	McNeillDavid DuncanSusan D CassellJustine <1960-> LevyElena Terry <1952->
Disciplina	808.5
Soggetti	Gesture Body language
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction: the dynamic dimension of language -- On the origins of modern gesture studies -- Gesture with speech and without it -- From gestures to signs in the acquisition of sign language -- How does spoken language shape iconic gestures? -- Forgetful or strategic? the mystery of the systematic avoidance of reference in the cartoon story narrative -- Metagesture: an analysis of theoretical discourse about multimodal language -- Potential cognitive universals: evidence from head movements in Turkana -- Blending in deception: tracing output back to its source -- A dynamic view of metaphor, gesture and thought -- Second language acquisition from a McNeillian perspective -- Face-to-face dialogue as a micro-social context: the example of motor mimicry -- Master speakers, master gesturers: a string quarter master class -- Constructing spiral conceptualizations from limited input: evidence from Norwegian sign language -- Environmentally coupled gestures -- Indexing locations in gesture: recalled stimulus image and interspeaker coordination as factors influencing gesture form -- The role of iconic gesture in semantic communication and its theoretical

and practical implications -- Intersubjectivity in gestures: the speaker's perspective toward the addressee -- An integrated approach to the study of convention, conflict, and compliance in interaction -- Discourse focus, gesture, and disfluent aphasia -- The construction of a temporally coherent narrative by an autistic adolescent: co-contributions of speech, enactment and gesture -- The body in communication: lessons from the near-human.

Sommario/riassunto

Each of the 21 chapters in this volume reflects a view of language as a dynamic phenomenon with emergent structure, and in each, gesture is approached as part of language, not an adjunct to it. In this, all of the authors have been influenced by David McNeill's methods for studying natural discourse and by his theory of the human capacity for language. The introductory chapter by Adam Kendon contextualizes McNeill's research paradigm within a history of earlier gesture studies. Chapters in the first section, Language and Cognition, emphasize what McNeill refers to as the intrapersonal plane. Many of the chapters adduce evidence for McNeill's claim that gestures can serve as a window onto the speaker's mind. Chapters in the second section, Environmental Context and Sociality, emphasize the interpersonal plane and exemplify McNeill's focus on how moment-to-moment language use is determined by contextual factors. The final section of the volume, Atypical Minds and Bodies, concerns lessons to be learned from studies of aphasic patients, autistic children, and artificial humans.
