Sommario/riassunto	Praise for Working With Grieving and Traumatized Children and Adolescents ""This much-needed book effectively argues for the use of structured activities as the basis for exploring trauma-specific questions in clinical work with traumatized children and adolescents. Numerous examples of children's artwork enhance the book and illustrate the effectiveness of the treatment. The authors' methods have been used successfully for many years and represent a major contribution to the study of trauma that will be welcomed by both students and seasoned practitioners.""-Nancy Boyd
