	Sommario/riassunto	Remembering the forgotten mother is a major theme in Myth & Mother in Spanish Novels and reflects the current interest in the recuperation of historic memory in Spain. The novels in this study feature mature protagonists who recall their mothers as a way to define their own identities and to nullify the fictional matricide prevalent in post-war Spanish novels; this twenty-first-century fiction highlights the haunting presence of the mother and begs comparison with myth.

	Sommario/riassunto	This volume presents a comprehensive survey of the lexicon and word formation processes in contemporary Japanese, with particular emphasis on their typologically characteristic features and their interactions with syntax and semantics. Through contacts with a variety of languages over more than two thousand years of history, Japanese has developed a complex vocabulary system that is composed of four

lexical strata: (i) native Japanese, (ii) mimetic, (iii) Sino-Japanese, and (iv) foreign (especially English). This hybrid composition of the lexicon, coupled with the agglutinative character of the language by which morphology is closely associated with syntax, gives rise to theoretically intriguing interactions with word formation processes that are not easily found with inflectional, isolate, or polysynthetic types of languages.
