Featuring interviews with more than thirty North Koreans who defected to Seoul and Tokyo, the book explores the subjective experience of the nation's famine and its citizens' social and psychological strategies for coping with the regime. These oral testimonies show how ordinary North Koreans, from farmers and soldiers to students and diplomats, framed the mounting struggles and deaths surrounding them as the famine progressed. Following the

development of the disaster, North Koreans deployed complex

discursive strategies to rationalize the horror and hardship in their lives, practices that maintained citizens' loyalty to the regime during the famine and continue to sustain its rule today. Casting North Koreans as a diverse people with a vast capacity for adaptation rather than as a monolithic entity passively enduring oppression, Marching Through Suffering positions personal history as key to the interpretation of political violence.
