2. Record Nr.	UNINA9910821713403321
Titolo	Peripheral nerve disorders // volume editors, Gerard Said and Christian Krarup
Pubbl/distr/stampa	Amsterdam : , : Elsevier, , 2013
ISBN	0-444-63355-3
Descrizione fisica	1 online resource (xx, 987 pages) : illustrations (some color)
Collana	Handbook of clinical neurology ; ; volume 115, 3rd series
Disciplina	616.85/6
Soggetti	Nerves, Peripheral - Diseases Neurology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section 1. Introduction -- section 2. Structure and function -- section 3. Clinical aspects -- section 4. Plexus and compression lesions -- section 5. Inflammatory root and nerve lesions -- section 6. Neuropathy and connective tissue disorders -- section 7. Neuropathy in infectious disorders -- section 8. Neuropathy and metabolic disorders -- section 9. Neuropathy and malignancy -- section 10. Cryptogenic, traumatic and iatrogenic neuropathies -- section 11. Familial neuropathies.
Sommario/riassunto	Disorders of the peripheral nervous system (PNS) are the cause of prominent neurological symptoms including weakness, sensory loss, pain and autonomic dysfunction associated with deficits, morbidity and mortality. These disorders may be primary hereditary or cryptogenic neurologic disorders confined to the PNS or part of the pathology of both the central nervous system and the PNS. Most PNS disorders are secondary to other system disorders and may be responsive to treatment of the primary disease. Important advances have been obtained in several areas including molecular genetics, biochemis
