Nota di bibliografia	Includes bibliographical references (p. [213]-217) and index.
Nota di contenuto	Naming the threat -- Security transformations -- Trust, networks and the transformation of organizational power -- IT corporate customers as end users -- Marketing service -- Situated exclusions and reinforced power.
Sommario/riassunto	In <i>Technological Turf Wars</i> , Jessica Johnston analyzes the tensions and political dilemmas that coexist in the interrelationship among science, technology and society. Illustrating how computer security is as concerned with social relationships as it is with technology, Johnston provides an illuminating ethnography that considers corporate culture and the workplace environment of the antivirus industry. Using a qualitative, interdisciplinary approach, which combines organizational and security studies with critical and social analysis of science and technology, Johnston que
