Sommario/riassunto

This book offers an in-depth review and unique insight into China's green economy. It is a collection of essays and papers presented by over 30 internationally regarded experts from China, Canada, the United States, Europe and Australia in a series of conferences on China's ecological development issues at the China-Europe Forum hosted by the Ecological Development Union International (EDUI) in 2010, and covers issues such as government policies, the challenges of water resources, renewable energy in the context of the 11th and 12th Five-Year Plans, and the sustainable development of the green economy.
